

## Biloxi Building 1 Entrance Change – Effective October 1, 2012 to January 2013

The main Building 1 entrance on the north side (bay side), across from the flagpole, will be closed from October 1 until January 2013 for work on the CARES Covered Walkway Project. The new entrance is relocated farther to the east of that same side of Building 1 where it connects to Building 53. This is the location of the old smoking shelter which has been cleaned up and has signs designating it as the entrance. The attached PDF shows the area affected. This is the same area that was closed for a few days in early September.
