

## Other Levels of Psychology Training

### Externship (Clinical Practica)

Students from nearby universities may utilize the psychology training opportunities offered through the GCVHCS to complete practica, whereby a student may spend one or two days per week under the supervision of Faculty who have volunteered to assist in meeting their practicum needs. These opportunities are limited and are contingent on the availability of resources. Their length of placement is coordinated through the Director of Training at the GCVHCS and the student's sponsoring faculty member or Director of Clinical Training for their academic program. Externs receive no stipend, but are awarded a letter grade as determined by their local supervisor. Interns may be called upon to assist in the professional development of these Externs.
