GOAL: Interns will continue to increase their knowledge of the diagnostic criteria for mental disorders classified in the DSM-IV-TR.

- Interns will engage in collaborative discussion with peers and this instructor regarding the diagnostic criteria for the majority of the mental disorders listed in the DSM-IV. These discussions will occur on a weekly basis and will encourage examination of diagnostic and treatment issues with respect to diversity of patients.

GOAL: Interns will continue to increase their knowledge of the clinical presentation of specific mental disorders.

- Interns will engage in collaborative discussion with peers and this instructor regarding the clinical presentations of Veterans with mental illness with whom they encounter/work with during the training year. These discussions will occur approximately once every two months beginning in December.
- Interns will discuss the accuracies and inaccuracies of various mental disorders portrayed in the media. These discussions will occur periodically throughout the training year.

GOAL: Interns will continue to incorporate diversity and multicultural considerations when working with different populations encountered in the VA System.

- Interns will engage in collaborative discussion with peers and this instructor regarding the importance of multicultural/diversity issues related to the Veterans with whom they may encounter/work with during the training year.
